FlyNamibia Announces Strategic Adjustments on Windhoek-Lüderitz Route

FlyNamibia, in partnership with TotalEnergies, is set to expand the number of seats available on the Windhoek to Lüderitz route, which operates every weekday. These adjustments aim to foster the sustainability of this route, which opened on 1 July 2023 and resulted in the transport of 5000 passengers since then. We celebrate this success thanks to TotalEnergies, who played a catalyser role in unlocking access to the south west of Namibia. These changes include the adoption of dynamic pricing effective from 18 April 2024 and potential adjustments to flight schedules to better align with passenger needs.

FlyNamibia is also pleased to announce the opening of our new office in Lüderitz at the Lüderitz Waterfront (Old Power Station). The introduction of this permanent office will enable the airline to give our customers and the Lüderitz community even more personalised and direct services.

"Our enduring partnership with TotalEnergies enables us to continuously adapt and offer the best service to our customers," stated Andre Compion, MD of FlyNamibia. "Having taken part in the opening of the Windhoek - Lüderitz route, I am delighted to see the success of it and I am confident that these changes are geared towards maintaining route sustainability, making it self-sufficient and ensuring affordable access to the Lüderitz community," stated Laurent Roché, TotalEnergies Country Chair.

This operational update is designed to benefit consumers by providing more flexible travel options and maintaining high service standards, characteristic of FlyNamibia's commitment to quality, along with ensuring the route's long-term sustainability.

FlyNamibia and TotalEnergies are dedicated to serving our community and boosting economic growth and to upholding the high standards of service and reliability that define our operations.

FlyNamibia operates domestic routes from Eros Airport in Windhoek to Ondangwa, Katima Mulilo, Lüderitz, and Oranjemund, as well as regional routes between Hosea Kutako International Airport and Cape Town International, in addition to Walvis Bay International Airport and Cape Town International in partnership with Airlink. Other regional routes include a direct service between Hosea Kutako International Airport and Victoria Falls, Zimbabwe, with the addition of Maun, Botswana to be launched in July 2024. FlyNamibia Safari connects travellers between Hosea Kutako International Airport and key tourist destinations within Namibia, as well as a route linking Eros Airport to Rundu. Flights can be booked through all major travel agencies, or directly via FlyNamibia's contact centre at +264 83 339 0011. Customers can also visit www.flynam.com for online bookings.

End.
